

Smart Access Control System

MVP's **ACCESS CONTROL SYSTEM** enables businesses like yours to effectively authenticate and authorize entry of every individual in your premises, providing you with full control through a network that ensures 100% security.

- **Facial image recording** (with or without mask on)
- **Contactless temperature reading** with alert features
- **Self-administer** – save on manpower deployment
- **Versatile deployment** – standalone or integrate with most door access system
- **Management system** – ease of record keeping and tracing
